Covata (ASX:CVT) At a time when hacking, cyber crime and data security has never been more prominent, Covata enables true ownership and control over your data in the cloud and over mobile services. Delivering data-centric security solutions without compromising simple usability; providing true end-to-end security. Data is always protected wherever it may travel – inside a network, beyond the domain, to mobile devices and to the cloud – with granular access controls that extend to external ad hoc users, view-only restrictions, real time revocation and complete visibility and auditability. With offices in Sydney, Washington DC, San Francisco and London, Covata has formed partnerships with marquee companies around the world including Cisco and T-Systems Deutsche Telecom.

Decimal Software Ltd (ASX:DSX) is an Australian based, listed software company that operates to service enterprise organisations (B2B focus) in banking and financial services. We provide automated or "rob-advice" solutions that banks and other financial institutions can brand as their own and use to service existing and new customers. Our primary business is to empower our customers with a powerful, functional and very consumer-focused automated advice platform. Since 2014 we have been enabling financial enterprises to provide their own-branded solutions with comprehensive underlying smarts to handle a ground-up, customer-first approach, with an end-to-end digital customer journey from engagement to execution of advice that includes in-built compliance, total agility and scalability and far lower costs to serve. Currently, we have over \$3B FUA and with global robo-advised funds to reach \$8.7T USD by 2020, means we have a total revenue opportunity in the vicinity of \$10B+.

Department 13, LLC (ASX:D13) was founded in Virginia in 2010 by a team of former military operators, scientists, and engineers whose goal was to transform how people use technology. D13's team does this by applying our decades of real world experience to our innovative and advanced technology to meet emerging requirements. Currently D13 is developing cutting edge software and communication systems for customers in both the public and private sectors. These technologies have the potential to transform the networking and communication fields. D13 has 8 granted patents and 11 patent applications pending in the fields of communication, networking, wireless technologies, security, and more. Some of the applications of our intellectual property include: Drone defense, Local area and wide area cellular communications and networking, Enhanced data bandwidth for all digital communications, Cyber security for mobile devices & Sophisticated RF technology applications (Radiometrics).

Dubber is the world's most salable call recording service which enables telcos and customers to think about capturing voice data in a way which they have never previously considered. A true native cloud platform, Dubber is revolutionising the call recording industry. Its highly available, unique total scale and true Software As A Service (SAAS) offering, enables telecommunication carriers and customers to implement and manage recordings as never before without the need for hardware or capital expenditure.

Family Zone: Keeping kids safe and managing their online activity is an issue for all families. It is growing challenge for schools and governments and garners regular media interest. These are global, emotive and urgent issues. Yet research suggests that today the multi-billion \$ parental control technology industry services less than 5% of the potential market. The problem is overwhelmed parents and parental controls tools that are a combination of complicated, avoidable and expensive. Family Zone has responded to this need. Family Zone has developed the world's first universal parental control platform. Built by a team of experts spanning the globe, the platform is cloud-controlled and deployable in-line, on-device and inside social/content networks. Family Zone's 'over-the-top' consumer service is post revenue in its pilot market, Australia. The company's strategic focus is North America and Europe with a wholesale focus in emerging markets. The company is deep into wholesale and partnership discussions with a number of international carriers and internet access providers. The company is currently raising pre-IPO funds and is looking to list in July/August 2016.

Kabuni (owned by Kabuni Ltd ASX:KBU) is a North American-based SaaS and e-commerce platform in the home design space that enables independent home design enthusiasts and home design professionals to grow their business through an omni-channel retail experience. Kabuni's platform enables designers worldwide to collaborate with clients anywhere in the US and Canada and earn income from the sale of home décor products and furnishings from Kabuni's catalogue through curated Inspiration Boards. Kabuni leverages proceeds from the platform to benefit local charitable organizations dedicated to combating homelessness. Kabuni believes in Better Homes for Everyone. For more information, please visit: <http://www.kabuni.com/> Kabuni is owned by Kabuni Ltd (ASX:KBU), an Australian-based company publicly traded on the Australian Securities Exchange (ASX). The company's strategic focus is to build a global business in the home space by developing an ecosystem of innovative technologies and solutions to enhance the industry for professionals and consumers alike. For more information, please visit: <http://investor.kabuni.com/>

LiveHire is a cloud based SaaS platform which provides enterprises talent-on-demand to manage their future hires. The LiveHire platform leverages its clients brand, networks and digital assets to invite and curate talent from everywhere, into a private Talent Community. LiveHire delivers proven and significant value to clients through time to hire, cost to hire, and candidate experience. The platform allows a recruiter or hiring manager to connect directly with engaged candidates with access to live and up-to-date profiles. LiveHire is currently a privately owned Australian enterprise, with its development and commercial team based in Melbourne, Sydney and Perth.

Medibio (ASX: MEB), is an Australian listed company that has developed an objective test to assist in the diagnosis of depression, chronic stress, and other mental health disorders. Based on research conducted over 15 years at the University of Western Australia, this test utilizes patented (pending) circadian heart rate variability and cloud based proprietary algorithms to deliver a quantifiable measure to assist in a clinical diagnosis. Studies are currently being undertaken by Johns Hopkins University School of Medicine and Ottawa University, among others, to validate the clinical utility of the test. This will potentially enable Medibio's technology to be the first FDA approved, objective, evidence based approach to the diagnosis mental health disorders for the medical industry. The technology also provides an objective method for the assessment of stress and mental wellbeing. This is currently being commercialized in the workplace stress/wellbeing market and can be easily translated into the wearable technology and App market.

9 Spokes brings together the world's best online business software and integrates it into a powerful decision making dashboard. With cloud applications together in one place, a small or medium sized business can instantly see how it is performing across key functions. 9 Spokes delivers key metrics and insights to help a business owner run their business from anywhere at any time, while also offering collaboration with their business advisors. The 9 Spokes platform offers a model for businesses to access the service and features directly, as well as a white labelled product that allows channel partners to offer the services to their customer base. 9 Spokes was awarded a "2013 Cool Vendor" by Gartner, the world's leading IT advisory group and was a regional winner of IBM's Smart Camp in 2014. 9 Spokes, it's all together better. www.9spokes.com

Norwood Systems Ltd (ASX:NOR) is revolutionizing the delivery of high-quality voice telecommunication services for individual business travellers and organisations on a worldwide basis. The Company listed on the ASX on 16 June 2015. Norwood has developed two breakthrough offerings, CORONA, for corporates, and World Phone, an App for individual travellers, which deliver the world's most advanced international fixed-line roaming solutions through local non-cellular networks, and reducing mobile phone roaming charges by more than 70%.

ResApp Health Ltd (ASX:RAP) is developing digital healthcare solutions to assist doctors and empower patients to diagnose and manage respiratory disease. We are creating easy to use, affordable, clinically-validated and regulatory-approved diagnostic tools that only require a smartphone. Our solutions are designed to be easily integrated into existing telehealth solutions and we are also working on apps to provide respiratory disease diagnosis and management directly to consumers and healthcare providers. ResApp was founded in September 2014 to commercialise technology developed by Associate Professor Udantha Abeyratne at The University of Queensland that uses sound to diagnose respiratory disease. Associate Professor Abeyratne's team has been engaged in the research and development of this technology since 2009 and has been funded by the Bill and Melinda Gates Foundation.

Schrole™ How would you like to invest in a sector tipped to double in size in the next 10 years? The international school market is a burgeoning niche, one where Schrole Group possesses expert insight into operational pain points. Flagship schools around the globe use Schrole Connect software to simplify the way they source candidates and fill vacancies. The newest product from Schrole Group offers a sophisticated, cloud-based app to address daily challenges caused by unplanned absences like sick days. Schrole Group is diversifying this offering by applying the same technology to hospitality, healthcare, and other industries experiencing productivity problems due to staffing shortages and roster issues. Continual investment in research and development ensures Schrole technology remains a valuable asset. With high margins, a steady income stream and a secure leadership team, Schrole Group presents an excellent opportunity for all kinds of investors.

Shark Mitigation Systems Ltd (ASX:SM8) has evolved as a world-leading Perth based company specialising in science-led technologies to help mitigate the risk of shark attack. These include the commercialisation of SAMS™ technology that is based on new science of shark visual systems developed in collaboration with University of WA for use in ocean apparel (wetsuits, water craft, surfboards, skis etc.) and commercial marine applications. Currently the company is undertaking R&D and commercialisation of Clever Buoy, a near shore shark detection system in collaboration with Optus and Google. This technology has significant global application in providing beach users and researchers with critical location and environmental information to ensure our beaches are safer from shark attacks. With these two technologies, key global partnerships and worldwide profile and recognition, the company is positioned for major organic growth and acquisition opportunities in the area of marine technologies, beyond the shark-related domains.

Stargroup Ltd (ASX:STL) is the only vertically integrated, Australian Automatic Teller Machine ("ATM") deployment company on the ASX. Stargroup is building a leading financial technology company and is a wholesale distributor of ATMs, Recycler ATMs, back office and coin counting technologies through StarATM; deploys ATMs in Australia via Star Payment Systems; and is an EFTPOS and Payment terminal provider via StarPOS. Stargroup also has exposure to the booming Asia Pacific market via its direct ownership interest in NeolCP Korea Inc, a leading private South Korean manufacturer of back office and banking technologies.

Syntonic Wireless (ASX:PSF) (in process of acquisition by Pacific Ore Limited, ASX:PSF) is a US based software and content services company that is transforming the mobile Internet with two technology solutions: Freeway by Syntonic® gives consumers the ability to connect to the mobile Internet free of charge on their mobile phone by having advertisers pay for the data; and Syntonic DataFlex® allows businesses a cost effective mobile split billing solution to separate personal from business use on employee smartphones. Founded in 2013, Syntonic has successfully launched both products in the U.S. and will be expanding their activities in 2016 to Southeast Asia and Latin America through their relationships with strategic mobile carriers and content providers. To learn more about Syntonic, visit www.syntonic.com.

Tech Mpire Ltd (ASX:TMP) is changing the way advertisers acquire their customers online, while delivering significant ROI. We are an advertising technology and performance marketing company, with a global presence and a focus on innovation. Using our platform nxus®, we develop comprehensive customer acquisition solutions for our clients and provide granular visibility into the drivers of online advertising performance.

Thred Ltd (ASX:THD) comes at an extraordinary time; a time when there are more mobile handsets than people, almost half of those people are on social media and messaging apps and the numbers are growing. Yet amongst all this connectivity, we believe life has become too cluttered, too noisy, too disorganised. Too many apps, too many contacts and too many connections means that social media has become quite unsocial.

Enter Thred. A unified social messaging platform that addresses the universal problem of contextual communications by empowering anyone, anywhere to easily connect with anyone else or any group across social networks, contact databases, email and more to create and manage communications (Threds) around relevant content. Thred embraces the entire world - East and West linking people globally.

TopBetta (ASX:TBH) is Australia's first Fantasy Wagering company listed on the ASX. After winning the EGR Gaming "Social Operator of the year" for the past three years, TopBetta and their unique tournaments finished second to William Hill Australia, in the most Innovative category for 2016 where it was competing against the industry heavyweights. TopBetta tournaments pit punters against punters and this form of wagering has really taken off in 2016 and they are now conducting massive tournaments worth as much as \$250k. They have closed some fantastic partnership deals during the start of 2016 and in early March closed a strategic marketing partnership with Fairfax ACM network of websites allowing tournaments to run across its 140 mastheads around regional Australia. TopBetta is capitalising on its unique Fantasy wagering platform that is fully integrated into a traditional wagering sports and race book that is proprietary built and owned by TopBetta Holdings.
