**ALCORE Pty Ltd** is seeking to build a chemical refining plant to convert bauxite into aluminium fluoride which is an electrolyte used in lithium ion batteries and to improve the efficiency of electro-smelting of aluminium. The patented Australian technology also allows ALCORE to make its own electrical power and heating by producing a natural gas substitute called Corethane Gas. Investments in ALCORE will be restricted and are expected to qualify as Early Stage Innovation Company ("ESIC") investments entitled to be claimed against current tax and to be free of capital-gains tax for 10 years.

**BrainChip Holdings Ltd (ASX:BRN)** is an ASX-listed, leading developer and provider of software and hardware for Artificial Intelligence (AI) and machine learning applications. It has pioneered and is commercialising an AI Processor Architecture based on a spiking neural network that simulates the learning mechanisms of the human brain. The spiking neural network technology can be trained instantaneously ("one-shot learning") by recognising patterns in milliseconds without having to be pre-programmed. This is an important feature in the world outside of the internet, where massive datasets are not available. For instance, a police department looking for a suspect in live video streams does not have thousands of images of that suspect, nor does it have weeks to train a traditional convolutional neural network system. The proprietary technology is also highly accurate, fast, completely digital and consumes very low power. Because the technology is trained, not explicitly programmed, it can be used in a variety of applications. For example, BrainChip's first application of this technology is the award-winning BrainChip Studio and BrainChip Accelerator, which aids law enforcement and intelligence organisations to rapidly search vast amounts of video footage and identify patterns or faces. **Change Financial Ltd (OTCQX:CNGFF, ASX:CCA)** is an award winning FinTech banking software provider, dual trading on the Australian Securities Exchange and in the US on OTCQX. Via Change Financial's 'ChimpChange Mobile Banking' brand, the Company offers consumers award winning secure, low-cost, feature-rich bank accounts. Based in Los Angeles, California, ChimpChange delivers a better way to bank with two key value propositions to customers. Firstly, it makes free retail banking available to tens of millions of Americans who typically pay monthly fees and overdraft fees to have a bank account. Secondly, the Company provides money management tools to help customers better understand how they spend their money, and save their money. The Company also offers real-time mobile cheque deposit and instant person to person payments. All funds on deposit are held with a federally regulated FDIC-insured bank in the USA. Change Financial is also developing MasterCard Certified processing capabilities to support Enterprise level banking services to a wide audience of U.S. banks and commercial enterprises. The Enterprise software will be available for public deployment in 2018. [Click here to visit the Change Financial website.](#)

**Dreamscape Networks Ltd (ASX:DN8)** is a trusted and affordable online solutions provider of domain names, hosting and technology solutions and owns Australia's #1 domain brand Crazy Domains and Singapore's #1 hosting provider Vodien Internet Solutions. The Dreamscape Networks Group offers affordable and easy to use online solutions that help businesses and independents establish, build, maintain and grow their online presence. Our solutions are innovative, user-friendly and engineered across all platforms embracing intuitive design and backed by our focus on best in world premium service. Vision:

To help our customers achieve their online goals by "Providing simple, innovative and affordable online solutions, that change lives"

Learn more at <http://www.dreamscapenetworks.com> ; <http://www.crazydomains.com> and <http://vodien.com>

Mark Evans, MD & CEO, commented:  
 "FY17 was a record year for Dreamscape Networks. We grew all pillars of the business and generated record cash and profits in our first year as a publicly listed company. We are also pleased to have delivered on the FY17 Prospectus profit forecast. With two successful acquisitions completed since listing in December 2016 and an exciting pipeline of new products, I am confident that we will continue to expand our operations. "This is an exciting time in Dreamscape Network's journey as we transition from being a domain name provider to a leading online solutions provider across Australia, New Zealand and South East Asia. We are well positioned to deliver increased revenues, free cash flow and earnings in FY18 as we continue to focus on executing our growth strategy."

**Gooroo Ventures Ltd (ASX:GOO)** has built predictive technology that makes hiring talent more accurate, teams more productive and communications more targeted. Gooroo does this by using artificial intelligence and neuroscience across three core products: Gooroo Jobs, Gooroo Mindspace and Gooroo Communities. Gooroo Jobs matches and ranks candidates to a role; Gooroo Mindspace assesses and charts the thinking patterns of an individual and a team to better understand future behaviour; and Gooroo Communities helps organisations build enriched talent databases that speed up access to qualified talent. Gooroo's breakthrough technology can remove up to 90% of the time wasted in screening and shortlisting talent, while improving selection accuracy by over 70%.

Headquartered in Melbourne, Gooroo kicked-off enterprise sales in May 2017 in Australian and expects to expand internationally in 2018. Client wins already include enterprises such as KPMG, Kinetic IT, Readify (Telstra) and Randstad.

Gooroo's ColourGrid™, formed from over 40 years of neuroscience research, defines an individual's pattern and priority of decision-making in different environments. This highly intelligent capability has global application in areas such recruitment, team design, communications and marketing. In June 2017, Gooroo was awarded Innovation of the Year in the Big Data / Machine Learning category at the AIIA iAwards (Vic). In January 2016, Gooroo announced a global alliance with Microsoft.

**Inabox Group Ltd (ASX:IAB)** provides technology platforms and solutions that deliver next gen telco, IT and cloud services. It does this via highly automated systems, a national team of over 320 knowledgeable and engaged people, plus over 15 years of experience.

As the telco landscape continues to undergo significant structural change, non-traditional entrants are changing the way consumers buy their telco services in Australia. Poised to take advantage of this, Inabox's innovative Platform-as-a-Service offering allows major brands and organisations to seamlessly deliver NBN, mobile and other services to their customers under their own brand with a purpose built, turnkey solution. This service is just one of a number of innovative products and services offered by the Company.

Inabox expects to deliver strong growth and revenue of over \$100m and continues to shift its revenue mix towards higher-margin, service-based revenue as it focuses on contract renewals and converting its strong sales pipeline.

**Mobecom Ltd (ASX:MBM)** is a full-stack customer engagement technology provider that delivers end-to-end technology solutions for businesses to engage with their customers. Its primary offering, airBux, is a digital currency platform that provides 'liquidity for loyalty' and is the Company's direct to consumer mobile application offering, with a cloud-based currency at its core. With mobile payment, ordering, booking and local offer capability; the airBux cryptocurrency will be the gateway to a new digital lifestyle rewards program. The Company's existing B2B offering provides its blue-chip customers based in Australia, Singapore, South Africa, the UK and Europe with technology solutions, built on its airBux proprietary technology, to deliver a complete end-to-end set of customer engagement technology requirements, including both back-end (databases) and front-end technology (design, mobile applications and websites). [Click here to visit the Mobecom website.](#)

**Mobilicom Ltd (ASX:MOB)** is a high-tech company that designs, develops and markets solutions for mission critical and remote mobile private communication networks without the need for, or use of, any existing infrastructure. Mobilicom's products and technology are based on an innovative approach that merges 4G communication with Mobile MESH technologies into a unified solution, with a number of product families that have been commercially deployed. Mobilicom develops in-house and fully owns all assets for its unique technology and solutions, including: 4G modem, MESH networking, radios, HW & SW applications, among others. The technology is backed by its patent holding and know-how. SkyHopper, the newest entity founded by Mobilicom Ltd. in 2016, targets the Professional, Commercial and Industrial UAV market, by leveraging Mobilicom's core technology as well as its success in the Gov't and Enterprise market. The SkyHopper family of products offers a wide range of solutions that have begun launching in April 2017. Despite the recent launch, SkyHopper PRO has already developed a track record with reference partners and customers on a global level. Furthermore, SkyHopper has gained an international presence with its sales and marketing activity and continues to build upon its excellent market traction among industry leaders.

**Nuheara Ltd (ASX:NUH)** is an innovative audio Wearables company. It has developed proprietary hardware and software to deliver multi-functional intelligent hearing technology that augments a user's hearing and facilitates cable-free connection to smart devices. With Nuheara's IQbuds™, consumers are able to augment their hearing according to their personal hearing preferences and connect hands free with their voice enabled smart devices. Nuheara's mission is to improve people's lives by allowing them to seamlessly listen, communicate and connect to their physical and digital world. [Click here to visit the Nuheara website.](#)

**ResApp Health Ltd (ASX:RAP)** is developing digital healthcare solutions to assist doctors and empower patients to diagnose and manage respiratory disease. We are creating easy to use, affordable, clinically-validated and regulatory-approved diagnostic tools that only require a smartphone. Our solutions are designed to be easily integrated into existing telehealth solutions and we are also working on apps to provide respiratory disease diagnosis and management directly to consumers and healthcare providers. ResApp was founded in September 2014 to commercialise technology developed by Associate Professor Udantha Abeyratne at The University of Queensland that uses sound to diagnose respiratory disease. Associate Professor Abeyratne's team has been engaged in the research and development of this technology since 2009 and has been funded by the Bill and Melinda Gates Foundation.

**Scout Ltd (ASX:SCT)** is a self-installed, wireless home security system that is making security more modern, open and affordable. The design-centric system integrates with best-in-class smart home devices, boasting partnerships with Amazon Alexa, Google Nest and Samsung SmartThings. Scout offers cellular backup and 24/7 police dispatch services on top of their devices which drives high-margin, monthly recurring revenue. Scout's system has been well received in the market, having been named "Best Designed" by ASecureLife and "#1 Best, No-Contract Home Security" by SecurityGem. The company is an Amazon Alexa Fund portfolio company and listed on the ASX in August of 2017. [Click here to visit the Scout website.](#)

**Sky and Space Global Ltd (ASX:SAS)** is an ASX listed (SAS) satellite company with European and Israeli centres of Aerospace, Satellite and Software Industry Experts.

The Company's core business is to operate a communications infrastructure based on nano-satellite technology and develop highly sophisticated software systems that will deploy, maintain orbit control and handle the communication network in space to provide a global coverage. The Company successfully launched its first three nanosatellites, the '3 Diamonds', into space in June 2017 and is preparing for the launch of a constellation of 200 more nano-satellites by 2020.

The Company's vision is to provide affordable communication coverage to anyone, anywhere, anytime with relatively low maintenance costs. This will enable Sky and Space Global to deliver cost-effective communications infrastructure and services to those who need it most and to disrupt the telecommunications and international transport industries. Sky and Space Global Ltd owns 100% of Sky and Space Global (UK) Limited.

**Titomic Pty Ltd** is an Australian advanced manufacturing specialist and in particular those industries that focus on advanced materials and additive manufacturing. Together with the Australian federal governments research body, (CSIRO), Titomic has developed a process by which products can be manufactured to virtually any shape and size via their proprietary Kinetic Fusion process. The Titomic Kintetic Fusion (TKF) process, sprays material powders such as titanium alloys, at supersonic speed onto a scaffold surface, resulting in the powder molecules elastically deforming on impact and then bonding at a near molecular level with the surrounding particles. This process can be applied to create tubular or shaped load bearing structures and will conform to nearly any shape. This process can also removes the need for secondary manual processes such as folding, bending and welding which are often expensive, time consuming and require extensive energy consumption.
