Altech Chemicals Ltd (ASX:ATC) is aiming to become one of the world's leading producers of 99.99% (4N) high purity alumina (HPA) (Al₂O₃) through the construction and operation of a 4,500tpa HPA plant at Tanjung Langsat Industrial Complex, Johor, Malaysia. Feedstock for the HPA plant will be sourced from the Company's 100%-owned kaolin deposit at Meckering, Western Australia. HPA is a high-value, high margin and highly demanded product as it is the critical ingredient required for the production of synthetic sapphire. Synthetic sapphire is used in the manufacture of substrates for LEDs; semiconductor wafers used in the electronics industry; and scratch-resistant sapphire glass used for wristwatch faces, optical windows and smartphone components. An emerging use for HPA is as a coating for lithium-ion battery separators. There is no substitute for HPA in the manufacture of synthetic sapphire. Altech is fast-tracking the development of its HPA project after securing a 10-year off-take agreement with Mitsubishi for 100% of its proposed HPA production.

Blockchain Terminal The multitrillion-dollar hedge fund industry has been unable to buy, trade or invest in cryptocurrencies due to a lack of institutional-grade tools with required compliance capabilities. Blockchain Terminal bridges the gap between institutional investors and the cryptocurrency market. By combining data from top cryptocurrency exchanges, information about upcoming ICO's, and news from publications and social media, our hardware creates a complete picture of the crypto world. Our proprietary ComplianceGuard Technology creates a strict framework that allows Chief Compliance Officers to manage and mediate all interactions on the terminal. The Blockchain Terminal Ecosystem runs on a utility token. Transactions and functions within the terminal are made exclusively with the BCT Token, which will be used to register, transact, and utilize applications, all within the platform. Security, ease of use, and compliance continue to be our company's driving forces. The Blockchain Terminal is currently in thirty hedge funds.

GlobalGuard is creating a global ecosystem of cyber crime fighters using the power of next generation AI and Blockchain technology to defend businesses from criminal intent. It will unite end users, technology partners, cybercrime experts and vendors, on a living neural network to identify and stop threats immediately. Drawing on the past 17 years of threat detection data and IP gathered by MailGuard, a global leader in cloud email cybersecurity, that stops threats 2-48 hrs ahead of rivals. GlobalGuard is preparing to complete a token sale later this year. GlobalGuard tokens will be used to access the platform, and pay businesses that contribute newly identified cyber security threat data in real time, making GlobalGuard a faster and more accurate platform for cybersecurity threat detection. **To learn more, visit: www.globalguard.io**

Mosaic is tackling two of the most pressing problems plaguing the cryptoasset space today: (1) unreliable and insufficient data and research; and (2) an overall painful user experience for market participants. Mosaic solves these problems by providing a database platform and decentralized market intelligence network with an intuitive user interface. We believe Mosaic will become the main cryptoassets app—the gateway to the crypto world—where people get their data and research, discuss ideas with other members of the community, and manage their portfolios through the Mosaic meta-exchange. **To learn more, visit: www.mosaic.io**

Nanollose Ltd (ASX:NC6) is an Australian future tech company that has developed the world's first plant-free fibre. This breakthrough could significantly contribute and reduce the textile industry's reliance on environmentally burdensome fibres like cotton and rayon. Over the past 5 plus years there has been a heightened level of awareness from customers that has pushed the textile industry to actively seeking more environmentally conscious and sustainable fibre procurement products and practices. Nanollose's fibre is made through a fermentation process that uses the waste from liquid food products like wine, sugar etc. It is low-cost, eco-friendly and the entire fibre-making process takes less than one month. Nanollose aims to forge itself into large brand and retailers as a raw material option that is a sustainable alternative. **To learn more, visit: www.nanollose.com**

NeuroScientific Biopharmaceuticals Ltd (ASX:NSB) is a biotech company focused on developing novel peptide-based drugs, called Emtins, which have the potential to treat neurodegenerative conditions. Emtin peptides are modelled on the active sites of a protein expressed in the brain following brain injury. NSB's lead peptide candidate, EmtinB, is most advanced as a treatment for Alzheimer's disease. EmtinB has been shown to induce the survival and regrowth of neurons through binding to specific receptors expressed by neuronal cells. The peptide offers a novel therapeutic treatment pathway for neurodegenerative diseases that are currently without effective treatment options, such as Alzheimer's disease. **To learn more, visit: www.neuroscientific.com**

NVOI Ltd (ASX:NVO) is Australia's only open market workforce-as-a-service platform that directly connects employers and skilled professionals, eliminating the friction points in contract workforce management. Our platform ensures low predictable costs, is performance based, easy to use, available 24/7, and provides freedom from administration. Unlike the traditional contract workforce management systems, Nvoi is the employer of record, providing instant engagement between hiring managers and rated skilled professionals, and automated back office processing at an affordable price. Nvoi's dual purpose provides value to Employers while giving Employees the job satisfaction they crave. **For Businesses:** Nvoi gives employers a way to quickly fill vacancies with qualified, verified and rated professionals, at a fraction of the time, cost and hassle of existing processes. **For Individuals:** Nvoi empowers individuals to control their careers, monetise their skills, work flexibly and create fulfilling careers all within our easy-to-use 24/7 platform. **To learn more, visit: www.nvoi.com.au**

Ookami Ltd (ASX:OOK) is positioned to grow into Australia's largest blockchain venture company listed on the ASX. The Company is achieving this through a portfolio of synergistic companies that disrupt data and advertising markets, investment platforms, software as a service (SaaS) and cryptocurrency applications. Ookami is developing an ecosystem of advanced technology solutions encompassing 'smart contracts' and blockchain technologies, secure identity management and verification ('Know Your Client') (KYC) and anti-money laundering (AML) applications, data markets, advertising analytics, investment platforms, cryptocurrency solutions and security and encryption applications. **To learn more, visit: www.ookami.com.au**

ResApp Health Ltd (ASX:RAP) is developing digital healthcare solutions to assist doctors and empower patients to diagnose and manage respiratory disease. We are creating easy to use, affordable, clinically-validated and regulatory-approved diagnostic tools that only require a smartphone. Our solutions are designed to be easily integrated into existing telehealth solutions and we are also working on apps to provide respiratory disease diagnosis and management directly to consumers and healthcare providers. ResApp was founded in September 2014 to commercialise technology developed by Associate Professor Udantha Abeyratne at The University of Queensland that uses sound to diagnose respiratory disease. Associate Professor Abeyratne's team has been engaged in the research and development of this technology since 2009 and has been funded by the Bill and Melinda Gates Foundation. **To learn more, visit: www.resapphealth.com.au**

Schrole Group Ltd (ASX:SCL) is an innovative provider of software solutions for the education sector. Schrole Connect, the company's flagship recruitment software, is now widely recognised as the leading candidate management solution in the rapidly expanding international schools sector. This market leading position will be further improved by a number of upcoming enhancements including a new candidate matching algorithm being developed in partnership with Edith Cowan University. In the Australian market, the Schrole Cover application has continued its rapid expansion and is widely used by schools to manage short term relief teacher replacement. Additionally, recent trials in the medical sector have been extremely successful with a number of hospitals now in the process of implementing the Cover software to manage their catering, cleaning and nursing staff. Schrole ETAS is also seeing exciting growth on the back of the resurgent mining sector and Schrole Verify's recent launch is yielding a pleasing market response. **To learn more, visit: www.schrolegroup.com**

SenSen Networks Ltd (ASX:SNS) provides video analytics and artificial intelligence data analytics software solutions to customers in the intelligent transportation system and gaming sectors located in Australia, Canada, Europe, India, Singapore and UAE. SenSen is one of the leading suppliers of Smart City solutions. Our ground-breaking software combines enterprise video and sensor data acquisition, data fusion and big data analytics into a highly scalable and configurable platform, designed to help our customers improve the speed and accuracy of decisions they take and to automate their business processes. **To learn more, visit: www.sensennetworks.com**

ShareRoot Ltd (ASX:SRO) is an established marketing technology company positioned to help protect the privacy and data of consumers and citizens worldwide. To date, the company's clients include McDonald's, Universal Pictures, and Johnson and Johnson, and its products have engaged hundred of thousands of consumers across 5+ continents. Initially starting with the successful launch of its legally secure UGC marketing platform, ShareRoot is now building MediaConsent- the industry first data and privacy preference platform that enables consumers and citizens to choose which companies can gather their data and market to them. Additionally, the company will be utilizing blockchain technology to ensure the security of all interactions and data sharing on the MediaConsent platform. Both the UGC platform and the MediaConsent platform are Software as a Service platforms sold in year-long contracts. **To learn more, visit: www.shareroot.co**

Tesseract Limited (ASX:TNT) is an Australian-based cyber security company that has developed its own intellectual property to deliver managed cyber security in a highly scalable way. The company generates revenue from using its software to manage its own direct customers and also derives revenue from partners to whom it has licensed the software. Tesseract has established the credibility of its software platform through long-term cyber security contracts with companies such as Toyota, Nintendo, PwC, BMW, and so on. The company is now embarking on a new phase of growth by packaging the enterprise-grade security platform that it has used to secure its blue-chip customers into an innovative cyber-security product targeting the SMB market. **CyberBiz opens up a huge market for Tesseract, targeting more than 2 million SMBs in Australia** alone, with the potential to expand internationally. There is widespread acknowledgment that the SMB market is under-served in terms of robust cyber security offerings and CyberBiz has been specifically developed to gain rapid market share in this space. Tesseract achieved revenue of \$5.4M last year and is growing faster than the market average. The company is not reliant on any single large customer or vertical segment for continued growth and has locked-in annuity revenue that extends beyond 2020. Tesseract is poised for significant growth by building on that locked-in annuity base through continued success in the enterprise market and through the huge global potential that CyberBiz offers in the under-served SMB market. **To learn more, visit: www.tesseract.com**

Vitro Software is a leading international technology company that provides software and services that drive efficiencies and quality in healthcare.
