TechKnow INVEST PERTH

The premium investment forum for technology companies

Tuesday 8 December 2020 Ritz Carlton Perth, WA

ARCHER

Archer Materials Ltd (ASX:AXE) is a materials technology company developing innovative deep tech in quantum computing, biotechnology, and reliable energy. The Company has strong intellectual property, world-class in-house expertise, a unique materials inventory, and access to Tier 1 technology development infrastructure. **Visit: www.archerx.com.au**

icetana

icetana Ltd (ASX:ICE) is a global software company providing AI based video analytics solutions to a wide range of industries. The motion intelligence software developed by icetana is designed to identify risk events and anomalous actions in real-time for large scale camera surveillance networks. icetana has secured excellent reference customers across various industry verticals including universities, prisons, casinos, shopping malls and logistics operations. During COVID the company has managed cash efficiently and leveraged remote working to ensure minimal impact to customers worldwide with all customers being retained and renewed over the past 2 years. icetana has been successfully implemented at over 40 sites across four continents. **Visit: www.icetana.com**

cirralto

Cirralto Ltd (ASX:CRO) is a transaction services business supplying industries with a broad range of B2B payment services, digital trading software and integrated solutions. Our goal is to convert EFT payments to card payments utilising the BPSP engagement coupled with our payments collaboration framework. Our competitive advantages deliver customers end-to-end e-invoicing integration, rapid ordering, digital trust and automated reconciliation. Through our core product Spendia, we deliver a fully integrated digital payment and software solution that enables businesses to transform with fast, error-free digital efficiency. **Visit: www.cirralto.com.au**

emyria

Emyria Ltd (ASX:EMD) creates drug development programs for partners or self pursuit. Emyria's independent clinics, bespoke remote patient monitoring technologies and clinical-trial-grade data platforms can accelerate treatment development by turning clinical data into Real World Evidence (RWE) and unique IP. Emyria's RWE provides insights into the safety, quality and efficacy of unapproved treatments, in real patients, in the community which can greatly accelerate the registration of new treatments. Once treatments are registered with an official regulator, they can become available to a much wider population of patients via routine prescription pathways creating great value. Recently, Emyria announced the launch of its own drug development program to register new treatments for the growing challenge of mental health. **Visit: www.emyria.com**

InteliCare

InteliCare Holdings Ltd (ASX:ICR) provides family and care givers a real-time view of the well-being of people in an independent living environment. This real-time view and the ability for family to be informed and act when something may be wrong reduces potential risks for seniors or people with disability living at home alone. InteliCare uses data from "smart" sensors to build a model of normal domestic routine within a home. An early view of deviations from routine may indicate a health or wellbeing issue, that when addressed will avoid complications leading to potential future higher levels of care. A range of sensors and "insights" can be activated to address the risks associated with ageing or other situations and provide family and carers with information to guide conversations that may address issues before they escalate into health or safety problems. **Visit: www.intelicare.com.au**

Marketch

Marketch have been building institutional trading technology from Perth for over 20 years. In response to the unfair nature of traditional trading pricing, where frequent traders can spend tens of thousands a year just on fees, Marketch have recently released a model built to reward active retail traders. Marketch offers real-time price data, information and trading tools that enable greater insight, control and transparency over trading decisions, even on mobile devices. **Visit: www.marketch.com.au**

NeuroScientific
BIOPHARMACEUTICALS

NeuroScientific Biopharmaceuticals Ltd (ASX:NSB) is a biotech company focused on developing novel peptide-based drugs, called Emtins, which have the potential to treat neurodegenerative conditions. Emtin peptides are modelled on the active sites of a protein expressed in the brain following brain injury. NSB's lead peptide candidate, EmtinB, is most advanced as a treatment for Alzheimer's disease and Glaucoma. EmtinB has been shown to induce the survival and regrowth of neurons through binding to specific receptors expressed by neuronal cells. The peptide offers a novel therapeutic treatment pathway for neurodegenerative diseases that are currently without effective treatment options. **Visit: www.neuroscientific.com**

Neurotech

Neurotech International Limited (ASX:NTI) is a medical device and solutions company incorporated in Australia and operating through its wholly-owned, Malta-based subsidiary AAT Research Limited. Neurotech's primary mission is to improve the lives of people with neurological conditions, with in-home-use and clinical neurotechnology solutions that are both accessible and affordable. Through flagship device Mente and its associated platform, Neurotech is focused on facilitating the development and commercialisation of technological solutions for the screening and treatment of symptoms associated with conditions such as autism. Neurotech is also commencing clinical trials through its exclusive license of unique cannabis strains. The trials are part of Neurotech's research into the potential of cannabinoids for medicinal use in treating neurological disorders including autism, epilepsy and ADHD. **Visit: www.neurotechinternational.com**

NGS+
Nutrition • Growth Solutions

Nutritional Growth Solutions (ASX:NGS) develops, produces and sells a range of patented, clinically tested children's milk formulas designed to ensure children receive all the necessary vitamins and minerals for their growth. Founded by expert pediatricians, the lead product, Healthy Height, is a clinically proven protein powder designed to help kids optimise their height gain. It is already being sold in the USA, Canada, and Israel, exclusively through online sales channels. In the US, Healthy Height is sold via www.healthy-height.com and on Amazon and is covered by an insurance billing code, making it possible for some qualified insurance holders to receive reimbursement for their Healthy Height purchases. Market entry into China has now been established with entry into other lucrative South East Asian markets also planned. Healthy Height is also sold by Unilever in India under license from NGS as Horlicks Growth Plus. **Visit: www.ngsolutions.com**

INU
NUHEARA

Nuheara Ltd (ASX:NUH) is a global leader in smart personal hearing devices which change people's lives by enhancing the power to hear. Nuheara has developed proprietary and multi-functional intelligent hearing technology that augments a person's hearing and facilitates cable free connection to smart devices. Nuheara is headquartered in Perth, Australia and was the first consumer wearables technology company to be listed on the Australian Stock Exchange (ASX). In 2016, the Company released its revolutionary wireless earbuds, IQbuds, which allow consumers to augment their hearing according to their personal hearing preferences and connect hands free with their voice-enabled smart devices. In 2020 Nuheara released its third generation IQbuds² MAX. Nuheara products are now sold Direct To Consumer (DTC) and in major consumer electronics retailers, professional hearing clinics, pharmacies and optical chains around the world. The Company's mission is to transform the way people hear by creating smart hearing solutions that are both accessible and affordable. **Visit: www.nuheara.com**

ORBITAL
UAV

Orbital UAV Ltd (ASX:OEC) is a world leader in the design and manufacture of integrated engine systems and flight critical components for military tactical unmanned aerial vehicles (UAVs/drones). Exporting products to some of the world's largest Defence prime contractors, Orbital UAV is uniquely positioned to meet the high-performance requirements of military UAVs through its patented technology and proven operational experience. Orbital UAV is currently in production of two industry-leading engine models as part of its long term agreement with Boeing subsidiary, Insitu Inc. and recently announced further engine development contracts with Northrop Grumman and one of Singapore's largest defence companies. **Visit: www.orbitaluav.com**

Osteopore
Empowering Natural Tissue Regeneration

Osteopore (ASX:OSX) specialises in the production of 3D printed bioresorbable implants that are used in conjunction with surgical procedures to assist with the natural stages of bone healing. Osteopore's products are manufactured inhouse using 3D printing technology that is precise and allows for customisation of shape and geometry. The unique 3D printed biomimetic micro architecture of the 3D scaffolding which is contained within the Osteopore products provides for infiltration of cells and blood vessels, both of which play key roles in wound healing and tissue repair. Osteopore products are made of a US FDA approved polymer called polycaprolactone (PCL). PCL is bioresorbable, malleable, slow-degrading and possesses mechanical strength similar to trabecular bone. **Visit: www.osteopore.com**

Recce
Pharmaceuticals

Recce Pharmaceuticals Ltd (ASX: RCE) is pioneering the development and commercialization of New Classes of Synthetic Anti-Infectives designed to address the urgent global health problems of antibiotic resistant superbugs and emerging viral pathogens. Recce antibiotics are unique – their potency does not diminish even with repeated use, a common failure associated with existing antibiotics and their propensity to rapidly succumb to resistant superbugs. Patented lead candidate RECCE® 327, wholly owned and manufactured in Australia, has been developed for the treatment of blood infections and sepsis derived from E. coli and S. aureus bacteria – including their superbug forms. The FDA has awarded RECCE® 327 Qualified Infectious Disease Product designation under the Generating Antibiotic Initiatives Now (GAIN) Act – labelling it for FastTrack Designation, plus 10 years of market exclusivity post approval. Recce wholly owns its automated manufacturing, ready to support first-in-human clinical trials. Recce's anti-infective pipeline seeks to exploit the unique capabilities of RECCE® technologies targeting synergistic, unmet medical needs. **Visit: www.recce.com.au**

rent

Rent.com.au Ltd (ASX:RNT) By reimagining the renting experience to create Australia's most empowered rental community, RENT is building a world where renting is rewarding, because we're made for renters. Offering innovative solutions to renters searching for their new home, RENT has built a large and unique audience of more than 700,000 renters per month, with almost 1 million people creating their Renter Resume. Having recently achieved profitability, RENT is now focussing on the much larger and more lucrative tenancy phase of renting starting with developing RentPay, a payments and digital wallet system that will deliver flexibility to renters in how and when they pay their rent. **Visit: www.investors.rent.com.au**

ResApp
HEALTH

ResApp Health Ltd (ASX:RAP) is developing digital healthcare solutions to assist doctors and empower patients to diagnose and manage respiratory disease. We are commercialising easy to use, affordable, clinically validated and regulatory approved diagnostic tools that only require a smartphone. Our cough diagnostic application, ResAppDx is licensed to two Australian telehealth companies and our sleep apnoea screening test, SleepCheck is available to download in 36 countries on the App Store and is partnered with HealthEngine. Both applications are the first of their kind and are regulatory approved in Australia and the EU. ResApp was founded in September 2014 to commercialise technology developed by Associate Professor Udantha Abeyaratne at The University of Queensland who has received funding by the Bill and Melinda Gates Foundation. **Visit: www.resapphealth.com.au**

VECTION
TECHNOLOGIES

Vection Technologies Ltd (ASX:VR1) is a multinational software company that focuses on real-time technologies for industrial companies' digital transformation. Through a combination of its 3D, Virtual Reality, Augmented Reality, Industrial IoT and CAD solutions, Vection helps companies and organisations to innovate, collaborate and create value. **Visit: www.vection.com.au or www.mindeskvr.com**
